

Recent advances in nonlinear partial differential equations and applications

A workshop in honor of
[Peter D. Lax](#) and [Louis Nirenberg](#)

June, Wednesday 7-Saturday 10, 2006
Toledo, Spain

This conference focuses on the modern theory of nonlinear partial differential equations and their applications. It aims to provide a forum for the dissemination of new scientific ideas and discoveries and enhances scientific communication by bringing together scientists working in these fields. There will be plenary talks and poster presentations; conference attendees are invited to contribute a poster.

Confirmed Speakers

L.L. Bonilla - Universidad Carlos III
H. Brézis - Université Paris VI
A.J. Chorin - UC Berkeley
D. Christodoulou - ETH Zurich
C. Dafermos - Brown University
A.S. Fokas - University of Cambridge
F. Golse - Université Paris VII
A. Grunbaum - UC Berkeley
J. Jiménez - Universidad Politécnica de Madrid
B. Keyfitz - Fields Institute, Houston University

S. Klainerman - Princeton University
C.D. Levermore - University of Maryland
Y.Y. Li - Rutgers University
A. Liñán - Universidad Politécnica de Madrid
A.J. Majda - Courant Institute, NYU
D.W. McLaughlin - Courant Institute, NYU
C.S. Morawetz - Courant Institute, NYU
P. Sarnak - Princeton University
S. Venakides - Duke University

All people wishing to attend all or part of the lectures have to register.

Deadline for registration and payment of registration fee: March 31th, 2006.
Deadline for poster abstract submission: February 28th, 2006

The number of participants is limited. Conference badges will be required to enter the Conference Hall. After the deadlines, people wishing to attend the meeting or present a poster should contact the organizers at ln06@mat.ucm.es, to check space availability.
